#### **DETAILED ACTION**

### **Double Patenting**

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-8 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-8 of copending Application No. 09/854,144. Although the conflicting claims are not identical, they are not patentably distinct from each other because claims 1-8 of the instant application are various wording of claims 1-8 of the copending Application No. 09/854,144. For example, the terminal of claims 1-2 of the copending Application No. 09/854,144 including: an oscillating circuit; a demodulator; means for regulating a signal phase; means for measuring variable linked to a current in the oscillating circuit and the voltage thereacross; means for deactivating the phase regulation means; and means for forcing a value of a settable element of the oscillating circuit as specified in claims 1-2 of the instant application.

Art Unit: 2682

This is a <u>provisional</u> obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

## Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

 Claims 5-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In this case, claims 5-10, are dependent method claims depend on independent apparatus claim 1, that fail to point out and distinctly claim the subject matter.

Correction is required.

# Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical

Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting

Art Unit: 2682

directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

The applied reference has a common inventor with the instant application.

Based upon the earlier effective U.S. filling date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

2. Claims 1-4 are rejected under 35 U.S.C. 102(e) as being anticipated by Wuidart et al. (6,650,226).

Regarding claim 1, Wuidart discloses a terminal for generating an electronic field adapted to communicating with at least one transponder entering this field, including: an oscillating circuit R1, L1 and 24 adapted to being excited by a high-frequency remote supply signal of the transponder (See fig. 4 and col. 6 lines 12-27); a phase demodulator for detecting possible data transmitted by the transponder by modulating, at a rate of a sub-carrier, a load that it forms on the terminal's oscillating circuit (See fig. 4 and col. 5 lines 43-46, col. 6 lines 4-11); means for regulating a signal phase in the terminal's oscillating circuit in response to a reference value having a long response time as compared to the sub-carrier (See fig. 4 and col. 6 line 32 to col. 7 line 42); means 35, 34 for measuring variables linked to a current in the oscillating circuit and to the voltage thereacross (See figs. 7, 9 and col. 9 lines 1-13, 20-37); and means for

Art Unit: 2682

comparing present values of these variables with predetermined values (See figs. 8, 10 and col. 9 lines 14-19, 38-42).

Regarding claims 2-4, Wuidart discloses as cited in claim 1. Wuidart further discloses means for deactivating the phase regulation means (See fig. 4 and col. 6 lines 49-63) and means for forcing a value of a settable element of the oscillating circuit, wherein the settable element is formed of a variable capacitive element of the oscillating circuit of the terminal and is common to the phase regulation means and the forcing means (See fig. 4 and col. 6 lines 28-53).

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

US 6,307,468; US 5,703,573; US 6,650,227; US 6,498,923; US 6,154,635; US 6,650,229; US 6,703,921.

#### Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to **Tuan Tran** whose telephone number is **(703) 605-4255**.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Vivian Chin, can be reached at (703) 308-6739.

Any response to this action should be mailed to:

Commissioner of Patents and Trademarks

Art Unit: 2682

Washington, D.C. 20231

or faxed to:

(703) 872-9314 (for Technology Center 2600 only)

Hand-delivered responses should be brought to Crystal Park II, 2121 Crystal Drive, Arlington, VA, Sixth Floor (Receptionist).

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Technology Center 2600 Customer Service Office whose telephone number is (703) 306-0377.
